## Introduction and Methodology

- The Strategic Counsel is pleased to present findings of a national survey of 1000 Canadians.
- Results are based on tracking among a proportionate national sample of Canadians 18 years of age or older.
- Interviews were conducted between November 8<sup>th</sup> and November 11<sup>th</sup>, 2007.
- The following table outlines the sample distribution and associated margin of error.
- Note: Proportions may not sum to 100% due to rounding.

## Sample Distribution and Margin of Error

	November	<sup>•</sup> 8-11, 2007
National Sample Regions	Sample Size	Margin of Error ( <u>+</u> )
Canada	1000	3.1%
Quebec	247	6.3%
Rest of Canada	753	3.6%
Ontario	379	5.0%
West	297	5.7%

# Key Highlights

## **Overall Conclusions**

- 1. This poll suggests that we might be seeing a change in the political landscape with the return of the Mulroney file and the launch of a third party inquiry. However, it is not clear how the political landscape will be altered as these issues play out over the days and weeks ahead.
- 2. The poll confirms previous findings that the Liberals are the natural beneficiaries when the Conservatives hit a bump in the road the Liberals have made some modest gains at the expense of the NDP. Clearly, the Liberals have an opportunity to consolidate their position as the anti-Harper default party. The NDP should be concerned about how to position itself as the Liberals go on the offense in attacking the Government its numbers are down 7 points from 19% in June to 12% now. Our August poll found that NDP voters are the most virulent anti-Harper segment in the country and would be inclined to move to the Liberals if they had opportunity to defeat the Harper Government.
- 3. Even though the Conservative government announced a multi-year tax reduction package of worth billions of dollars, the party's popularity has actually declined particularly in Ontario two weeks later with the return of the Mulroney file. By contrast, the Liberal brand particularly in Ontario remains strong, even though there is some desire among the public to see the current Liberal leader replaced. Moreover, this poll indicates that the Government will need to manage the Mulroney file carefully in order to retain the high ground on accountability and transparency.
- 4. While Canadians continue to be relatively optimistic about the economy, they also see threats emerging from the south of the border Canadian businesses face bigger challenges selling into the US and the higher proportions of Canadians who will be heading to the US to travel more and do more shopping. Managing the economy may be looming as a larger issue in the months ahead.

# Liberals and Conservatives are now tied in their popular vote at 32% with the NDP dropping to 12%

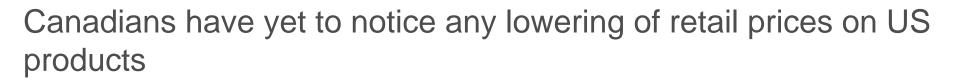

- While we conducted this poll from Thursday to Sunday, voter support for the Liberals increased following the Prime Minister's announcement that he would be appointing an independent third party to review the Mulroney-Schreiber affair.
- The Liberals have been able to gain ground primarily at the expense of the NDP, which lost three percentage points from our previous poll to reach its lowest level (12%). The NDP is down 7 points from 19% in June.
- Most of the Liberal gains from 40% to 47% have occurred in the crucial Ontario battleground. By contrast, voter support for the Conservatives has slipped somewhat in Ontario from 33% to 29%.

## While remaining optimistic about the country's economy, Canadians see potential threats from a weak US economy

- About 31% think the economy will become stronger and 43% feel that the economy will remain about the same (not getting better or worse), while only 1-in-5 (22%) expect the economy will get worse. The view in Ontario, where 27% think that economy is going to get worse, is more pessimistic. Not surprisingly, Westerners are the least pessimistic about the economy. There are no significant differences in views by either income or education.
- However, two-thirds (68%) of Canadians do believe that the rising dollar value will make it difficult for Canadian exporters. This perception is more strongly held by Ontarians (70%) and Quebecers (74%).
   BQ voters (83%) are particularly concerned about the impact of the rising Canadian dollar.
- Most Canadians (60%) see the rising Canadian dollar as a function of the weakness of the American economy rather than a strong Canadian economy. Again this view is most strongly held in Central Canada.
- Canadians see two reasons underpinning the rising Canadian dollar: the increasing prices of commodities (47%) and the decline in the US housing market (27%).

- About 70% believe that prices of US products have remained the same, while 16% believe that prices have decreased. This view is somewhat stronger in Quebec (74%).
- Slightly over half of Canadians (52%) believe that at this point retailers are profiting by not passing on the savings to customers. It is worth noting that Quebecers (65%) and BQ voters (64%) are the most inclined to believe this.
- However, there is a broadly-held expectation (57%) that with the increase in the value of the Canadian dollar prices on US products will decrease. Again, Quebecers (47%) and francophones (46%) are somewhat less convinced that the price of US products will fall.

# More Canadians want to travel more to the US and do more cross-border shopping

- Three-quarters (75%) of Canadians expect that Canadians will be visiting the US more often and buying more while they are there. Interestingly, Quebecers (67%) are just slightly less inclined to have this expectation.
- About 27% plan to do, or have already done, more shopping in the US than previously.
- About one-quarter (24%) say that they will be holidaying and visiting the US more than previously.

# 1-in-2 support a national referendum on the Senate's future, while public sentiment is more divided over whether it should abolished

#### Support for the Referendum Proposal

- Half of Canadians support the idea of holding a national referendum during the next federal election on whether the Senate of Canada should be abolished, while 33% oppose holding a referendum on this question.
- Support for this proposal is strongest in BC (58%) and Quebec (55%), while Ontarians (43%) are clearly less enthusiastic.
- Conservative (60%), NDP (53%), and BQ (66%) voters are the most supportive of holding a referendum, while Liberal voters (44%) are less supportive.
- Francophones (56%) and those making more than \$100K (56%) are more likely to support the referendum proposal.

# 1-in-2 support a national referendum on the Senate's future, while public sentiment is more divided over whether it should abolished

#### Support for abolishing the Senate

- Views on the actual abolishment of the Senate generally mirror views on the questions of holding a national referendum.
- About 46% say they support the abolishment of the Senate, with 37% opposed.
- Support for the Senate's abolishment is strongest in Quebec (63%) and weakest in Ontario (36%). A plurality of BC residents (44%) supports the Senate's abolishment, while Prairie residents are evenly divided 39% support and 42% oppose.
- Again, Conservative (56%), NDP (50%), and BQ (75%) supporters are the keenest to support the Senate's abolishment, with the majority of Liberal voters (55%) being opposed.

# A plurality of Canadians are open to efforts to replace Stephane Dion

- Just over one-third (36%) would support efforts to replace Stephane Dion as Liberal Leader, while only 18% would be opposed. Some 32% expressed no opinion over whether Dion should be replaced. Liberal voters (41%) and francophones (43%) would be slightly more likely than Canadians overall to support such efforts, with support among Conservatives lower at 35%.
- At this point, Justin Trudeau (40%) garners the highest level of public support if Stephane Dion were to be replaced, with Michael Ignatieff (25%) and Bob Rae (23%) trailing.
- Liberals voters are just slightly less inclined to think that Justin Trudeau (35%) would be the right leader, and more likely to see Ignatieff (30%) and Rae (24%) as the better choices. Non-Liberal voters are generally more interested in Justin Trudeau becoming the Liberal party leader.

Unchanged	15	13	16	17	17
Harder	74	78	73	71	74
DK/NA/Ref	5	2	6	5	5

Q. What kind of impact do you think the greater value of the Canadian dollar will have on Canadian companies that do business in the US? Will they find it easier to sell their products in the United States, harder, or will this be unchanged?

## Is the high Canadian dollar a good thing or a bad thing?

			Reg	jion	
	Canada	Quebec	Rest of Canada*	Ontario	West
	Nov 8-11	Nov 8-11	Nov 8-11	Nov 8-11	Nov 8-11
n=	1000	247	753	379	297
	%	%	%	%	%
Bad thing because it makes it difficult for us to sell to the US	68	74	66	70	60
Good thing because it allows us to buy US products more cheaply	25	22	26	24	31
DK/NA/Ref	7	5	8	6	10

Q. Some people say that the high Canadian dollar is a good thing because it will allow businesses and consumers in Canada to buy US products more cheaply. Other people say that the high Canadian dollar is a bad thing because it will make it more difficult for our businesses to sell into the US and will lead to consumers buying more in the US and less in Canada. Thinking of these two points of view, which one comes closest to your own?
